SPECIALIST DIAGNOSTIC  
RADIOLOGISTS

## **Musculoskeletal Ultrasound Preparation Requirements**

- These are specialized ultrasound examinations of the joints, no special preparation is required, however, the patient is required to expose the desired region of interest, which may include the patient undressing and wearing a gown.
- Due to this being a specialized examination, it requires special radiological skill and can be time consuming. It is therefore essential that patients book an appointment, unless it is an emergency.
